*Ethiopian has dominated the African aviation market since its founding in 1946. Despite the several governments that have controlled Ethiopia throughout the years, it has managed to preserve a solid reputation. [Ethiopian airline dubai office](#) offers a comprehensive range of support services, including some of the top maintenance and training facilities in Africa, in addition to its substantial goods activities. There are around 20 aircraft in the fleet, plus countless other smaller planes, helicopters, and even crop dusters that are used for side jobs.*
